Publishing schedule

Every post, story and channel update with its date, Cairo time, file and sticker. Files are in the zip folders **1-profile-picture** to **4-stories**; full captions are at the end, ready to copy.

Why 8 PM? Egyptian students are most active on Instagram between 8 and 11 PM, so every grid post goes out at 8:00 PM Cairo time. Stories fill the rest of the evening. Reply to every comment and DM in the first hour after each post; that is what pushes the post to more people.
